Imiola HAK-POL a été créée en 1991. Nous sommes spécialisés dans la fabrication d'attache-remorques et proposons plus de cinq cents modèles pour voitures de tourisme et véhicules utilitaires. Pour assurer à la fois la qualité et la précision de nos produits, les éléments nécessaires à la production d'attache-remorques sont fabriqués à l'aide de machines modernes à commande numérique (CNC) telles que des découpeuses au laser, des postes de soudage robotisés et des presses plieuses. Pour assurer la meilleure tenue dans le temps, nos attelages, après grenailage et phosphatation reçoivent une couche de peinture en poudre polyester.

La société HAK-POL a mis en place et utilise un système de gestion de la qualité répondant aux exigences de: PN- EN ISO 9001: 2015-10 dans le domaine de la conception, fabrication, vente de barres de remorquage et service de coupe au laser.

Tous nos produits disposent de l'homologation européenne e20 et E20. De plus, nous possédons un certificat EAC attestant que le produit est conforme aux normes de qualité et de sécurité des marchés des États membres de l'Union Douanière Eurasiatique.

Afin d'obtenir les homologations, nos attelages sont testés par le laboratoire PIMOT: institution habilitée par le ministère de l'Infrastructure à fournir et à délivrer de telles certifications.

En vertu de notre accord, PIMOT Varsovie assure le suivi de la qualité de nos produits.

Nous commercialisons actuellement nos attache-remorques dans 12 pays européens avec un succès toujours croissant.

Imiola HAK-POL werd in 1991 opgericht. We zijn gespecialiseerd in het produceren van trekhaken en bieden meer dan vijfhonderd modellen aan voor bedrijfswagen en toerisme wagens. Om zowel de kwaliteit als de precisie van onze producten te garanderen, worden de nodige elementen voor het produceren van trekhaken, aan de hand van moderne machines (CNC) gemaakt zoals lasersnijders, robot lasmachines en afkantpersen. De beste duurzaamheid garanderen we met een laag polyesterpoederverf na het gritstralen en een fosfaatbehandeling van onze koppelingen.

HAK-POL heeft een kwaliteitsmanagementsysteem geïmplementeerd dat voldoet aan de vereisten van: PN- EN ISO 9001: 2015-10 op het gebied van ontwerpen, produceren en verkopen van trekhaken en lasersnijservice.

Al onze producten hebben de Europese goedkeuring e20 en E20. Daarnaast hebben we een EAC-certificaat waaruit blijkt dat het product voldoet aan de kwaliteits- en veiligheidsnormen van de markten van de lidstaten van de Euraziatische douane-unie.

Om goedkeuringen te verkrijgen worden onze koppelingen getest door het PIMOT-laboratorium, instelling die door het ministerie van Infrastructuur gemachtigd is om dergelijke goedkeuringen en certificaten te verstrekken.

Krachtens de overeenkomst, PIMOT Warschau verzekert de kwaliteitscontrole van onze producten.

Momenteel verkopen we onze trekhaken in 12 Europese landen met toenemend succes.

Imiola HAK-POL was established in 1991. We specialize in manufacturing tow bars for over five hundred models of passenger cars and delivery vans. To ensure both high quality and precision of our products the elements needed for tow bars production are made with the use of modern CNC (Computer Numerically Controlled) machines such as laser cutting machines, robotic welding stand and punching press. To ensure the best possible protection for our tow bars they are cleaned in the blast cleaning chamber and phosphor coated before receiving their final coat of polymer powder paint.

HAK-POL company has implemented and uses a management system satisfying the requirements of: PN- EN ISO 9001:2015-10 – the scope of certification: DESIGN, MANUFACTURE AND SALE OF TOW BARS AND LASER CUTTING SERVICES.

The quality of our products is confirmed by the e20 and E20 EU approvals. Additionally, we possess an EAC certificate that confirms that the product is compliant with quality and safety standards that are binding on the markets of the Customs Union Member States, i.e. Russia, Kazakhstan and Belarus.

In order to obtain homologations our tow bars are tested by the Automotive Industry Institute (PIMOT) laboratory. The PIMOT laboratory is the institution authorized by the Ministry of Infrastructure to provide and grant such certifications.

Under the agreement, the Automotive Industry Institute (PIMOT) in Warsaw keeps control over our production.

We currently sell our products in 12 European countries from which we receive an ever increasing amount of interest.
